Selected Experience

Freelance Web Developer

Client websites, portfolios, and business landing pages

Built responsive, lead-focused websites with contact forms, service pages, SEO tags, project galleries, and polished interaction design.

Java and Database Projects

Academic and institute systems

Created project structures for student management, admission tracking, enquiry storage, and report-style dashboards.

Project Highlights

- Startup SaaS dashboard with metrics, responsive charts, and conversion-ready screens.
- Local business commerce website with menu sections, WhatsApp CTA, and SEO-friendly structure.
- Portfolio website system with project filters, modals, testimonials, and print resume support.
